

MICROSOFT EXCEL PROJECT

Background

Linda Pizza is a Pizza making company with different types of pizza made in different sizes.

Due to the higher demand for pizza by their customers, they have decided to open new branches to meet their customer demand. Because of this, they requested the supply of pizza ingredients from a pizza ingredient supply company called Dford to supply them pizza ingredients on credit and pay after sales.

As a Data Analyst of Dford, the database **Pizza_Sale** of Linda Pizza was sent to you by your company to organize and analyse with the following task:

Task

1. How many Pizza types contain cheese
2. How many Pizza types contain tomatoes
3. How many Pizza types contain bacon
4. Create a visual to show the highest 10 Pizza Id ordered
5. Create a visual to show the average price of each pizza size
6. Create a visual to show the average price of each Pizza type regardless of their size
7. Create a visual to show what Pizza is the most expensive in general
8. Create a dashboard for the visuals created in 4,5,6,7
9. According to the trend of their sales and considering your analysis, what recommendation will you give your company as a guide in partnering with Linda Pizza.
